

flowsafe[®]

LS-TM Float Switch

OPERATION AND MAINTENANCE MANUAL

First Publication Date: 01/09/2020

Revision: v1

Revision Date:

The flowsafe float switch should be installed by suitably qualified personnel only. Electrical termination should be carried out by a suitably qualified electrician in accordance with prevailing regulations.

Fit a 1 1/4" boss to the top of the tank, or alternatively remove the fitting and replace with a cable gland.

The switch is provided with the switch in the normally open position, so will close on rise. To change this, gently remove the spring circlip and reverse float.

AFTER SALES SERVICE

At **flowtech**[®] we operate a network of Service Engineers located throughout the UK who are supported by our offices located in Greater Manchester. The distribution of engineers means that in the majority of cases we are less than 4 hours away from attending a customer call out.

We place great emphasis on providing technical back up to support our Service Engineers in resolving some difficult operational and technical issues. We pride ourselves on completing a project on time, within budget and never leaving a problem unresolved, or a customer waiting. This quality of service has made us the first choice for our customers.
